PROJECT DESCRIPTION

PROJECT DESCRIPTION

1. SymCheck is an open web application that allows users to upload images of concerning conditions and/or written symptoms in order to receive a cursory diagnosis.
 1. If it's a severe condition/illness, the application will tell the user to seek medical attention and assist him or her in finding nearby medical facilities via a location prompt.
2. This application is primarily for users who want to self-diagnose themselves for any reason.
3. This project will be based on the use of machine learning algorithms to make accurate predictions, and will utilize languages such as Python, HTML, CSS,

The image is a conceptual composition. On the right, a person's head and shoulders are shown in profile, facing left, rendered in a dark blue silhouette. The background is a light blue gradient filled with floating binary digits (0s and 1s) in various sizes and opacities. On the left side, a glowing green DNA double helix structure is visible, extending from the bottom left towards the top center. A semi-transparent dark green rectangular box is positioned on the left side, containing the text 'MARKET ANALYSIS' in white, bold, sans-serif capital letters.

MARKET ANALYSIS

MARKET ANALYSIS

| App Name | Platform | Upload Images | Other functionalities |
|-------------------|----------------------------|---------------|--|
| SymCheck | Web Application | Yes | Show nearby hospitals if illness is severe |
| AskMD (Sharecare) | Mobile and Web Application | No | Microphone voice feature for ease of use |
| Mayo Clinic | Web Application | No | Sidebar when to seek medical care |
| Symptomate | Mobile and Web Application | No | Graphical representation of affected area |

PERSONAS

WORKING ADULT

COLLEGE STUDENT

NURSE

Details

Cindy is a 32-year old single mother with 2 boys: Adrian(4 years old) and Simon(6 years old). She also has a full-time job as a business analyst, working 80 hours a week. Simon has a rash starting on his chest. Cindy called the family doctor about the rash, but they are not able to diagnose him without a physical visit.

Goals

Cindy would appreciate if there was an application she could use to diagnose her son's symptoms. This would allow the doctor to verify the illness in confidence. The doctor would then be able to provide a treatment plan and she saves time by avoiding a trip to a healthcare facility.

PERSONA #1: WORKING ADULT

Details

Ryan is a junior at Pace University. Not only is he swarmed with assignments, but he has also just started to notice strange skin lesions on his arm. Although he wants to get his skin checked, he just doesn't have time to waste in his schedule to check-in to a doctor's office or urgent care facility if it is not necessary.

Goals

Ryan needs a cursory method of diagnosis for his abnormality, *without* having to pay a physical visit to some medical facility.

Our SymCheck application can solve this dilemma, and if the application identifies his lesions as to serious or even life threatening, it can recommend him to visiting a doctor or the nearest hospital, in which case Ryan will *know* that a visit to a doctor becomes a priority

PERSONA # 2: COLLEGE STUDENT

Details

Lisa has 15 years of experience as a Nurse in Urgent Care facilities. Now during COVID-19, most of the patients complain to her about the waiting period to see the doctor. To help minimize the number of patients in the office Lisa seeks an application to help her patients determine if their skin issues need seeking medical attention immediately.

Goals

Lisa wants to refer her patients to a reliable source for skin illnesses that can be treated at home. The SymCheck application would offer guidance to determine what the skin illness may be and give them advice for a home remedy. It would also help stop the spread of COVID-19 by reducing the traffic in Urgent Care facilities. Lisa would use SymCheck to show her patients how reliable it is in diagnosing skin illnesses.

PERSONA # 3: NURSE

PROJECT TIMELINE

HIDDEN AGILITY'S SCHEDULE

Sprint 1 08/24 - 09/21

| Name | Status | Priority | Estimation (days) |
|--|---------------|----------|-------------------|
| Create significant business application | Done | High | 10 |
| Set up development tools (GitHub and Jira) | Done | Medium | 5 |
| Establish team roles | Done | Medium | 2 |
| Establish Weekly meetings | Done | Medium | 5 |
| Work on Deliverable 1 | Working on it | High | 7 |
| Total | | | 29 |

Sprint 2 09/22 - 10/5

| Name | Status | Priority | Estimation (days) |
|---------------------------------|-----------------|----------|-------------------|
| Create Acceptance Criteria | Not started yet | Medium | 1 |
| Create Test Cases | Not started yet | Medium | 1 |
| Create mock-up web page designs | Not started yet | High | 3 |
| Create User Stories | Not started yet | High | 1 |
| Research Django framework | Working on it | High | 3 |
| Research Chicken pox symptoms | Working on it | High | 2 |
| Gather images of chicken pox | Ongoing | High | 3 |
| Work on Deliverable 2 | Not started yet | Medium | 7 |
| Total | | | 21 |

HIDDEN AGILITY'S SCHEDULE

Sprint 3 10/06 - 10/26

| Name | Status | Priority | Estimation (days) |
|-----------------------|-----------------|----------|-------------------|
| Draft technical paper | Not started yet | Medium | 8 |
| Train ML Algorithm | Not started yet | Critical | 3 |
| Test ML Algorithm | Not started yet | Critical | 3 |
| Develop web pages | Not started yet | High | 6 |
| Work on Deliverable 3 | Not started yet | Medium | 7 |
| Total | | | 27 |

Sprint 4 10/27 - 11/23

| Name | Status | Priority | Estimation (days) |
|---------------------------------|-----------------|----------|-------------------|
| Finish development of web pages | Not started yet | High | 3 |
| Finish project demo | Not started yet | Critical | 5 |
| Finish technical paper | Not started yet | Critical | 5 |
| Work on Deliverable 4 | Not started yet | Medium | 7 |
| Total | | | 20 |

RETROSPECTIVES

TOP VOTED RESULTS

What went well

- Keeping a repository of useful material

What needs improvement

- Zoom meeting purpose
- Note taking during meetings

Next Steps

- Define meeting agendas each week
