SymCheck Application Acceptance Criteria

Issue type	ID	Summary
Acceptance Criteria	HID-29	1.Given the patient wants to reach SymCheck application, when the patient navigates to the homepage, then the SymCheck logo should be clearly displayed 2. Given the patient is on the homepage, when the patient is looking for information about SymCheck, then the homepage should clearly display a welcome message that describes what the application does, and how this is achieved (what technologies are used, etc.) 3. Given the patient is on the homepage, when the user is looking for any disclaimer messages, then the homepage should clearly display and identify a disclaimer so the user is made aware of the quality/accuracy of our website when used in lieu of formal healthcare
Acceptance Criteria	HID-30	1. Given that the patient is on the HomePage, when the patient clicks the button that says "Get Diagnosed", then it will take the patient to the ImageUploadPage
Acceptance Criteria	HID-31	1. Given that the patient is on the ImageUploadPage, when the patient searches to find a place to upload an image, then the page should display a field where the user can upload an image to be analyzed/classified by the SYMCheck application 2. Given that the patient is on the ImageUploadPage, when the patient searches for image requirements, then the page should provide information on acceptable image formats, file sizes, etc. 3. Given that the patient is on the ImageUploadPage, when the patient uploads an image, then the upload field should indicate that an image can be uploaded via browsing of the user's local machine
Acceptance Criteria	HID-32	1. Given that the patient is on the ImageUploadPage, when the patient uploads an image, then the user should see the name of the submitted file.
Acceptance Criteria	HID-33	1. Given that the patient is on the ImageUploadPage, when the patient uploads an image with no issues, then the webpage should allow the "Submit" button to take them to the ResultsPage 2. Given that the patient is on the ImageUploadPage, when the patient uploads an image with errors, then the webpage will display a message describing what the issue is about their submission.
Acceptance Criteria	HID-34	1. Given that the patient is on any page that requires user input or displays results of said input, when the patient is looking for immediate help, then the webpage should display a set of symptoms that generally indicate a critical or dire condition
Acceptance Criteria	HID-35	1. Given that the patient is on any page that requires user input or displays results of said input, when the patient clicks on the "FIND THE NEAREST EMERGENCY ROOM" button, then it will show a Google Map that will find the hospitals near the patient's indicated location
Acceptance Criteria	HID-36	1. Given that the patient is on any page that is not the HomePage, when the patient clicks on the "Home" button, then the webpage will redirect the user to the HomePage
Acceptance Criteria	HID-37	1. Given that the patient is on the ResultsPage, when the patient successfully submitted their image, then the webpage will display the results of the image assessment in percentages of what illness(es) the patient may have
Acceptance Criteria	HID-38	1. Given that the patient is on the ResultsPage, when the patient successfully submitted their image, the webpage will contain a field that displays all known information (i.e. stats, severity, home remedies, etc.) about the illness/affliction
Acceptance Criteria	HID-39	1. Given that the patient is on the ResultsPage, when the patient successfully submitted their image, then the ResultsPage should contain a seperate field that indicates under what conditions the patient should definitely see a doctor (i.e. age, state of pregnancy, etc.)
Acceptance Criteria	HID-41	1. Given that the patient is on the ResultsPage, when the patient clicks on the "New Diagnosis" button, then the webpage will redirect the patient to the ImageUploadPage and removes all data saved within the ResultsPage
Acceptance Criteria	HID-43	1. Given that the patient is on any page that gives results to their submission(s), when the patient reaches the bottom of the page, then the webpage displays a disclaimer to remind the user that no matter how accurate the SYMCheck application may turn out to be, the application is, itself, in no way a replacement for physical medical diagnoses/care
Acceptance Criteria	HID-44	1. Given that the patient is on any page that gives results to their submission(s), when the patient clicks on the "here" link under the Feedback section, then the link should open the patient's default mail application with the To, Subject, and partial Body filled.
Acceptance Criteria	HID-57	1. Given that the user is on the UserInputPage, When the user uploads their image, Then the user should see their uploaded image within the application.
Acceptance Criteria	HID-58	1. Given that the patient is on any page of the SymCheck application, when the user clicks on the chatbot's greeting, then a dialogue window will pop up in the bottom right corner. 2. Given that the patient has a dialogue box opened with the chatbot, when the user enters "pinkeye" or "chickenpox", then the chatbot will respond by telling the patient they should go to the CDC website.
Acceptance Criteria	HID-62	1. Given that the patient has a browser open, when the patient types in SymCheck's URL, then the SymCheck application should be accessible without any errors.
Acceptance Criteria	HID-81	1. Given that the patient is on any page, when the patient clicks the FAQ button, then the patient should access the FAQ page 2. Given that the patient is on the FAQ page, when the patient clicks the Home button, then the patient is returned to the Homepage 3. Given that the patient is on the FAQ page, when the patient clicks on the New Diagnosis button, then the patient is rerouted to the ImageUpload page 4. Given that the patient is on the FAQ page, when the patient clicks the Find Nearest Emergency Room button, then the patient will see the nearest ERs and interact with the map 5. Given that the patient is on the FAQ page, when the patient clicks the send feedback link, then the application will open the patient's default mail app with the email section prefilled to send to symcheckapp@gmail.com
